Systems biology of photoreceptor-specific gene expression

Prof. Joseph Corbo

Washington University School of Medicine, in St. Louis, Missouri

Am Dienstag, 01. Juni 2010, um 18.00 Uhr
im Klinikum der Universität Regensburg, Seminarraum A2

Joseph Corbo is an Assistant Professor of Pathology and Immunology at Washington University School of Medicine in St. Louis, Missouri. Dr. Corbo obtained his undergraduate degree at Stanford University. He then entered the medical scientist training program at the University of San Diego, California, where he obtained the M.D. and Ph.D. degrees. Dr. Corbo subsequently did residency training in anatomic pathology and a clinical fellowship in neuropathology at Brigham and Women's Hospital and Children's Hospital, Boston, both associated with Harvard University. After his clinical training, Dr. Corbo did a research post-doc with Dr. Connie Cepko at Harvard Medical School.

Dr. Corbo's lab studies the systems biology of photoreceptors. Specifically, he is interested in the transcriptional regulatory networks that underlie the development, evolution and diseases of photoreceptors in the retina. Dr. Corbo has published his important scientific achievements in renowned journals like Cell, PNAS, PloS Genetics and Journal of Neuroscience.
