HTRA1 transgenic mouse model

PD Dr. Sascha Fauser

Klinikum der Universität Köln

Am 20.10.2011 um 18.00 Uhr

im Klinikum der Universität, Seminarraum A2

PD Dr. Sascha Fauser is head physician of the Department for Vitreoretinal Surgery at the University Eye Hospital of Cologne. He is a physician-scientist combining the treatment of patients with clinical and basic research. His primary research interests are the genetics of ocular diseases, and he is primarily studying the mechanisms of macular degenerations including age-related forms. His most recent results give important insights into the disease mechanisms which arise from mutations in the newly discovered HTRA gene which is associated with an increased risk for age-related macular degeneration.

Sprecher der FOR 1075: Prof. Dr. Ernst Tamm
