New Thoughts Regarding Generation of Aqueous Outflow Resistance

Prof. Mark Johnson

Northwestern University in Evanston, Illinois, USA

Am Mittwoch, 31.03.2010 um 18.00 Uhr
in der Anatomischen Sammlung

Mark Johnson is one of the most highly respected bioengineers working in the field of ocular fluid dynamics with special emphasis to the problem of glaucoma. In his work, Dr. Johnson has contributed like no other to our knowledge on the fluid mechanics of the trabecular outflow pathways, and its changes in glaucoma. His work has been published in the internationally leading journals of the field.
