Academic visit from Slovakia to the University of Regensburg

International academic mobility programme (ERASMUS+)

March 27th – 31st 2017

In the framework of the mobility programme ERASMUS+
Associate Professor Mária PISOŇOVÁ and Dr. Adriana NAGYOVÁ from our partner Comenius University in Bratislava (Faculty of Education) spent a few days at the University of Regensburg.

During their stay the Slovakian scientists, whose major field of expertise is school management, shared ideas to collaborate with colleagues from the Institute of Education at the University of Regensburg. Both scientists also had the opportunity to visit different schools in Regensburg with the aim to learn more about the German school system and to get an insight into teaching methods.

The dean of the faculty, Professor Dr. Dr. h. c. Hans Gruber mentioned during the meeting: “... we’ve found some unexpected links in the time we’ve spent together – such as working with the same people on big projects, and thinking of some potential research collaboration ideas. We’ve also been talking about the possibility of arranging student field trips to Slovakia.”

Both scientists were impressed by the resources and the service provided by the University Library.
