

September 2019

Master Thesis and Internship position in Structural Biochemistry

Cryo-EM and X-ray crystallography in Transcriptional Regulation

Methods

Biochemical and molecular biology techniques

Cryo-Electron Microscopy / X-ray crystallography and data processing

Computational 3D molecular modelling

We offer two projects studying transcriptional regulation / ribosome biogenesis associated processes in the group of Prof. Christoph Engel (Structural Biochemistry). A research visit to our collaborator in Canberra (Australia) is intended but optional.

For details, please contact christoph.engel@ur.de
