

Photo Andreas Fuchs

Looking for a group where you could perform  
***Bachelor work...?***  
***Master work...???***  
***Medical PhD...???***

Then join our team and have fun exploring the  
wonderland of **Epigenetics!**

We work with human cell lines (methods used: transfection, proliferation and colony formation assays, RNA/DNA purification, qPCR, Western Blot, Immunoprecipitation) and human proteins (methods used: protein/domain expression in *E.coli* or in Insect cells, protein purification, DNA/RNA electrophoretic mobility assay, state of the art method Microscale Thermophoresis, nanoDSF)
