

University of Regensburg

The Faculty of Biology and Pre-Clinical Medicine invites applications for a Junior Professorship of Cellular Neurobiology (Level W1)

The position is available as soon as possible for a period of six years and entails the legal status of temporary civil servant (*Beamtenverhältnis auf Zeit*). It is expected that the successful applicant will strengthen the field of interdisciplinary neurobiology in the Faculty and the University. The advertisement addresses highly qualified scientists with an expertise in Cellular Neurobiology at an early stage of their scientific career who seek to establish an independent research group. We are particularly interested in candidates who have worked on *in vivo* neuronal imaging (e.g. *in vivo* calcium imaging or *in vivo* electrophysiology) and its analysis or comparable techniques during their PhD project. Collaborations with other groups of the Graduate School "Neurobiology of socio-emotional dysfunctions" (<https://www.uni-regensburg.de/research/grk-emotion/grk-home/index.html>) are desirable.

The successful applicant will be involved in teaching animal physiology and neurobiology in a B. Sc. program (preferentially in German) and in teaching neurobiology in a M. Sc. program (in English).

Formal requirements for the position are a PhD or comparable degree, outstanding scientific qualifications which are demonstrated by an excellent doctorate thesis, as well as teaching experience.

The University of Regensburg is particularly committed to reconciling family and career (for more information, see <https://www.uni-regensburg.de/universitaet/personalentwicklung/familien-service>). In order to reach its equal opportunity commitment and to increase the number of female professors, applications from qualified female scientists are particularly encouraged. In case of essentially comparable qualifications, applicants with severe disabilities will be considered preferentially. Insofar as the candidate worked as a doctorate student and postdoctoral fellow, the duration of the employment may exceed six years only in exceptional cases.

Applications with the required documents (curriculum vitae, certificates, list of publications, research strategy, teaching concepts) are to be submitted, preferentially electronically, to the Dean of the Faculty of Biology and Pre-Clinical Medicine at the University of Regensburg, Prof. Dr. Ralph Witzgall, D-93040 Regensburg (fakultaet.biologie@ur.de) by **January 5th, 2023**.
