

Wissenschaftliches Kolloquium

Sonderforschungsbereich 960/ Biochemie-Zentrum Regensburg

• • • • •

Wintersemester 12/13, BIO 5.2.38, Universität Regensburg

15.10.2012, 15.00 h

Sondertermin: Dr. Andreas Ehrensberger (London Research Institute, Cancer Research UK)

Title: „Reconstituting State Transitions of Native Mammalian Chromatin“

Host: Joachim Griesenbeck

25.10.2012, 14.00 h

Prof. Dr. Hinrich Boeger (UC Santa Cruz, USA)

Title: „Linking stochastic fluctuations in chromatin structure and gene expression“

Host: Joachim Griesenbeck

06.11.2012, 17.00 h

Dr. Mieke Van Lijsebettens (Ghent University, Belgium)

Title: „Chromatin control of growth, development and plasticity in plants“

Host: Klaus Grasser

13.11.2012, 17.00 h

Dr. Witold Filipowicz (FMI Basel, Switzerland)

Title: „Mechanisms and regulation of miRNA-mediated repression and miRNA metabolism in mammalian cells“

Host: Gunter Meister

15.11.2012, 14.00 h

Dr. Tom Moss (Université Laval, Quebec, Canada)

Title: „The in vivo requirements for Upstream Binding Factor UBF and its role in RNA polymerase I transcription“

Host: Herbert Tschochner

22.11.2012, 14.00 h

Dr. Thomas Ott (LMU München)

Title: „Plasticity of microdomains and lateral dynamics of protein complexes in plant plasma membranes“

Host: Stefanie Sprunck

29.11.2012, 14.00 h

In-house SFB Seminar: Projects B1, Z1

06.12.2012, 14.00 h

Prof. Dr. Irmgard Sinning (Biochemie-Zentrum Heidelberg)

Title: „Ribosome-associated chaperones and enzymes“

Host: Herbert Tschochner

17.01.2013, 14.00 h

Dr. Timo Strünker (Forschungszentrum caesar Bonn)

Title: „CatSper Ca²⁺ channels – the female's gateway into sperm“

Host: Stefanie Sprunck

24.01.2013, 14.00 h

Dr. Keith Slotkin (Ohio State University, USA)

Title: „Multiple roles for Transposable Element Small RNAs“

Host: Thomas Dresselhaus

31.01.2013, 14.00 h

In-house SFB Seminar: Projects A1, B7

07.02.2013, 14.00 h

Prof. Dr. Eric Westhof (Université de Strasbourg - CNRS, France)

Title: „The Detection of the Elementary Modules of RNA and Progress in RNA Modelling“

Host: Herbert Tschochner

14.02.2013, 14.00 h

Dr. Stephanie Kreis (University of Luxembourg)

Title: „miRNAs and melanoma development“

Host: Anja Bosserhoff

28.02.2013, 14.00 h

Dr. Daniel Wilson (Gene Center, LMU München)

Title: „The universally conserved elongation factor EF-P regulates translation by alleviating ribosome-stalling at polyproline stretches“

Host: Herbert Tschochner
