Course of studies: Start of studies in winter semester, full-time

Specialization: Bioinformatics

The following course of study shows you in which semesters which modules are offered, if you decide to specialize in Bioinformatics. Compulsory modules must be completed during your studies. For all other modules, you can choose which modules you would like to complete. It is recommended that you complete a total of 30 ECTS* through modules or courses per semester (totalling 120 ECTS in four semesters).

Courses are usually offered on an annual rhythm, i.e. they cannot be completed in every semester, but either annually in the winter semester or annually in the summer semester.

The course of study includes the entire range of courses and modules offered by the Master's degree programme:

- the compulsory area (incl. Master's Thesis) (at least 60 ECTS)

- the compulsory elective area "Core Computer Science" (at least 18 ECTS)

- the compulsory elective area "Specialization: Bioinformatics" (at least 42 ECTS)

*ECTS and credit points (CP) or in German Leistungspunkte (LP) are the same thing: a measure of the workload during your course of study. According to the European Credit Transfer System (ECTS), one ECTS/CP corresponds to 25 to 30 hours of work (course attendance, preparation and follow-up time as well as studying for exams or writing assignments or papers). Approximately 30 ECTS/CP should be completed in one semester of full-time studies - i.e. 60 ECTS/CP in one academic year of full-time studies.
