

The conference aims at exploring the link between the readings of the Gospels during liturgical services and the calendars they are included in. First focused on liturgical calendars and prescriptions in Greek manuscripts (Tetraevangelia, Lectionaries, Typica,...) reflecting different rites (Jerusalem tradition, Constantinopolitan Liturgy, transitional forms...), the conference gives the opportunity to enter into dialogue with specialists in other traditions from Christian East and West (Arabic, Aramaic, Armenian, Ethiopian, Georgian, Latin, Old Slavonic, Syriac). This dialogue will enable to sketch, confirm, modify or precise main tendencies in the evolution of the pericope system and the liturgical calendars (Byzantinization / Constantinopolization), around what can be called the core or the crown of the Liturgy of the Word.

One main line is the constitution and the evolution of the calendars, of the different cycles (fixed and movable) and of the commemorations (through integration, replacement and disappearance of feasts). Were the Gospel readings themselves adapted to these changes, to new uses and practices? What were the criteria for the delimitation of the pericopes? What theological views and interpretations does the selection of these readings show, in relation to the feasts or the cycles they are associated with?

The other main line deals with the presentation and transmission of the pericope systems. How were the manuscript sources used to define and to find the Gospel readings, or to design new calendars and manuscripts? How do calendars, apparatuses and dividing systems work together? What other material (iconography, instructions, notes, prayers) accompanies the pericopes? Are there similarities in different rites and languages?

The conference is organized by the Chair of Liturgical Studies of Regensburg University and subsidised, among others, by the Fritz Thyssen Stiftung für Wissenschaftsförderung.

Conference venue
University Regensburg
Philosophicum, Großer Sitzungssaal
