

# EARLY CAREER RESEARCH SEMINAR

## Theory meets Reality

This semester, we suggest to gather and discuss the research problems we encounter as early-career researchers. We open the seminar to personal experiences, sharing our difficulties but also our solutions. If you struggle to find the right method to approach your topic, if you need help to write a research proposal, if you seek advice in time management or to get organized, if you don't know how to start (or end) writing ... we understand!

And we propose to find ways out collectively.
