

# **UNIVERSITÄT REGENSBURG**

**The newly-established Faculty of Informatics and Data Science invites applications for a**

**Professorship**

**of Technical Informatics**

**grade W3 (chair)**

The position is tenured (Beamtenverhältnis auf Lebenszeit) and can be filled as soon as possible.

The successful candidate should address, both in research and teaching, classical topics such as hardware technology, computer architecture and system software, and current areas of technical informatics, in particular those relevant in the context of data science and machine learning. Topics include, but are not restricted to, parallel and distributed architectures, high-performance computing, application-specific hardware, reconfigurable architectures, hardware/software co-design, performance engineering, automation technology, real-time systems, cyber-physical systems, network technology (computer networks), quantum computing and neuromorphic computing.

The successful candidate has the opportunity to shape the new faculty and contribute to the development of the new bachelor and master degree programs in informatics and data science. Interdisciplinary cooperation with colleagues from other faculties is desired.

Involvement in the university's academic self-governance and in teaching is a prerequisite. Teaching duties include, in particular, basic courses in technical informatics.

Prerequisites for taking up the position are, alongside the general conditions from public sector employment law, a completed university degree, pedagogic suitability, particular aptitude for academic work, generally shown by a doctoral degree, and further academic performance shown via a habilitation or equivalent which may have been performed outside higher educational institutions or as part of the duties of a junior professor.

Universität Regensburg is particularly committed to reconciling family and working life (for more information, see <http://www.uni-regensburg.de/chancengleichheit>). To fulfill the equality directive and increase the number of female professors, we explicitly encourage applications from qualified women.

In case of essentially similar suitability, applicants with severe disabilities will be preferentially selected.

The prerequisites for appointment under civil servant law are based on the provisions of the Bavarian Public Service Code (BayBG) and the Bavarian University Staff Act (BayHSchPG). Please note the age limit specified in Art. 10 Para. 3 BayHSchPG.

Applications containing the normal documents (resume, certificates, list of publications with copies of up to five papers) should be submitted, solely in digital form (PDF format, in a single file)

**by 31 October 2020**

**to the chair of the founding committee, Vice-president Prof. Dr. Nikolaus Korber,**
